-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 January 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-48 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-48 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hertz Corporation hereinafter known as Hertz in view of Motorola Corporation's online access to information to Motorola business partners hereinafter known as Motorola in further view of Aquila et al US Publication US 2002/0035488 hereinafter known as Aquila.

Regarding claim 1, applicant acknowledges that it is known to employ an electronic rental management system using private frame relay connections for communication. Such a system was employed to permit a vehicle rental service provider to provide an insurance claims center of an insurance company with a direct electronic connection to the vehicle rental service provider's branch locations. Such a system employed data entry, which was usually accomplished by the vehicle rental service provider's employee based within the insurance claims center [page2, lines 7 – 13]. Also, it is known at the time of invention to a person with ordinary skill in the art that

Art Unit: 3629

businesses are known to use Electronic Data Interchange (EDI) to exchange data with business partners e.g. IBM's WebSphere, Message Queue Manager (MQM), APPC etc. to expedite transactions and minimize paper consumption. Hertz discloses system and method for managing rentals over a data communication network. Hertz allows customers to check rates and rent vehicles over the communication network.

It is obvious that Hertz system has network server with a file system which can be used by plurality of end users for accessing the information from server and file system [pages 19 – 22].

Hertz does not disclose allowing business partners to access Hertz system to get information with transactions they are involved in. Motorola discloses system and method which allows Motorola Business Partners with authorized access to view the transaction they are involved in. Therefore, it is known at the time of invention to a person with ordinary skill in the art to automate manual business processes to save on personnel cost, create a paperless business environment etc.

Hertz does not disclose a server system including a database having rental claim information for each of said rentals. However, Hertz discloses storing the data related to the vehicle rental agreements on a file system [page 22], and, allowing customers to modify or change their reservations. It is a business choice to decide what information they want to store in the file system like a database to meet their business requirement.

Hertz discloses providing access to plurality of client systems [Fig. 1]

Hertz discloses employing a global communication network to interconnect server system client systems.

Hertz discloses displaying at least some of said rental information for one of said rentals at one of said client systems. Hertz does not disclose displaying claim information. However, Motorola discloses to provide business partner related information to the business partner. Therefore, it would have been obvious to a person with ordinary skill in the art to provide claim information to the insurance service provider business partner to save on personnel cost, create a paperless business environment etc.

Hertz discloses to allows users to modifying change or cancel reservations. It is obvious that Hertz allows users to modify information stored in the system.

Hertz does not discloses managing claim processing and reviewing claim information. Aquila discloses system and method which relates to insurance claim processing systems in general, and more particularly to administering, tracking and managing insurance claim processing systems [0003]. Aquila discloses to review rental claim information [Fig. 4]. Therefore, it would have been obvious to a person with ordinary skill in the art to review claim information to minimize fraud.

Regarding claim 2, 6 – 7, Hertz discloses to allow customers to provide input (modify information) [page 22]. Also, Hertz discloses to allow users to cancel reservations (pending reservations) [page 22]. Hertz does not disclose displaying at client systems a scoreboard including a count of unconfirmed rental reservations. Applicant acknowledges that Figure 1 shows a display 2 of the prior electronic rental

Art Unit: 3629

management system including a scoreboard 4 for pending reservations, working rentals, closed rentals, incoming messages, and invoices. Neither Hertz nor prior art disclose to display count of unconfirmed rental reservations. However, It is a business choice to determine what information they want to display on the scoreboard. Therefore, it would have been obvious to a person with ordinary skill in the art to display the information like pending transactions to help determine the workload.

Regarding claims 3 – 4, applicant acknowledges to display list of working rentals as prior art [Fig. 5]. Applicant acknowledges that open rentals are rentals where the renter is actually in the vehicle (i.e. vehicle is still under the rental agreement). It is known at the time of invention to a person with ordinary skill in the art the business keep track of open contracts to determine the scheduling. For example, when a customer calls for reserving a vehicle like a truck, the renting company informs the customer whether the vehicle is available for renting during the period the customer desires (renting company has knowledge of what vehicles still under open contract and their expected close date). Therefore, if the business desired to keep track of open contracts, then it would have been obvious to a person with ordinary skill in the art to maintain a list of open rentals for allocation of resources.

Hertz does not disclose extending expected duration. However, it is known at the time of invention to a person with ordinary skill in the art that Rental Car Companies like Hertz have capability of extending the rental duration (it is known at the time of invention

Art Unit: 3629

to a person with ordinary skill in the art that customers often return the car earlier or extend it for few extra days, and, the rental companies are able to handle the situation). Therefore, it is known at the time of invention to a person with ordinary skill in the art to handle extension of rental duration to cater to customer needs.

Regarding claim 5, applicant acknowledges "Figure 6 shows a display 38 of the prior electronic rental management system including an "incoming messages" screen. Each message, such as 40, could be acknowledged or printed by the rental coordinator through buttons 42 or 44, respectively".

Regarding claim 8 – 9, Hertz discloses to allow customers to make reservations online [pages 17 – 21]. After the user has confirmed the information and submit request to reserve a vehicle, Hertz discloses to send confirmation (vehicle in unconfirmed state until the confirmation is received) [pages 51 – 52]. Examiner acknowledges that the print date of these pages is 24 September 2003, it was not possible for the examiner to go back in time to create a reservation on Hertz prior to the applicants priority date.

Hertz does not disclose to generate reports and what are the contents of the reports. Aquila discloses to provide canned or special reports [0063 – 0064]. The reporting sub-system summarizes and formats data stored in claim file or the insurance carrier system based on a number of criteria to generate various reports [0026].

Therefore, it is known at the time of invention to a person with ordinary skill in the art to provide reports to help the management understand business health and make business decisions.

Regarding claim 10 – 11, Hertz discloses to determine pending reservations. Hertz does not disclose to generate reports and what are the contents of the reports. Aquila disclose to provide canned or special reports [0063 – 0064]. The reporting sub-system summarizes and formats data stored eclaim file or the insurance carrier system based on a number of criteria to generate various reports [0026]. Therefore, it is known at the time of invention to a person with ordinary skill in the art to provide reports to help the management understand business health and make business decisions.

Regarding claims 12 – 13, Hertz does not disclose to determine open rentals. However, it is obvious that Hertz system can determine open rentals to determine when the vehicles will be returned, who are authorized to drive the vehicle etc.

Hertz does not disclose to generate reports and what are the contents of the reports. Aquila disclose to provide canned or special reports [0063 – 0064]. The reporting sub-system summarizes and formats data stored eclaim file or the insurance carrier system based on a number of criteria to generate various reports [0026]. Therefore, it is known at the time of invention to a person with ordinary skill in the art to

provide reports to help the management understand business health and make business decisions.

Regarding claim 14, Hertz discloses maintaining a file system, allowing customers to select rental variables, entering value (e.g. rate, special offers, insurance charges etc.) based on customer selections [page 28].

Hertz does not disclose to generate reports and what are the contents of the reports. Aquila disclose to provide canned or special reports [0063 – 0064]. The reporting sub-system summarizes and formats data stored eclaim file or the insurance carrier system based on a number of criteria to generate various reports [0026]. Therefore, it is known at the time of invention to a person with ordinary skill in the art to provide reports to help the management understand business health and make business decisions.

Regarding claim 15 – 19, Hertz does not disclose to generate reports and what are the contents of the reports, and what variables to use for generating reports. Aquila disclose to provide canned or special reports [0063 – 0064]. The reporting sub-system summarizes and formats data stored eclaim file or the insurance carrier system based on a number of criteria to generate various reports [0026]. It is obvious that reports are generated to help business make a decision. It is a business choice to select what

variables to use and what formula to apply to generate desired report. Therefore, it is known at the time of invention to a person with ordinary skill in the art to provide reports to help the management understand business health and make business decisions.

Regarding claim 20, Hertz does not disclose plurality of billed rentals. However, it is obvious that Hertz can access plurality of billed rentals to determine revenue earned over time.

Hertz does not disclose to generate reports and what are the contents of the reports, and what variables to use for generating reports. Aquila disclose to provide canned or special reports [0063 – 0064]. The reporting sub-system summarizes and formats data stored eclaim file or the insurance carrier system based on a number of criteria to generate various reports [0026]. It is obvious that reports are generated to help business make a decision. It is a business choice to select what variables to use and what formula to apply to generate desired report. Therefore, it is known at the time of invention to a person with ordinary skill in the art to provide reports to help the management understand business health and make business decisions.

Regarding claims 21 – 26, Hertz does not disclose to generate reports and what are the contents of the reports, and what variables to use for generating reports. Aquila disclose to provide canned or special reports [0063 – 0064]. The reporting sub-system

Art Unit: 3629

summarizes and formats data stored in claim file or the insurance carrier system based on a number of criteria to generate various reports [0026]. It is obvious that reports are generated to help business make a decision. It is a business choice to select what variables to use and what formula to apply to generate desired report. Therefore, it is known at the time of invention to a person with ordinary skill in the art to provide reports to help the management understand business health and make business decisions.

Neither Hertz nor Aquila disclose who the report is generated for. It is obvious that business generate plurality of report type to cater different functions of business.

Regarding claim 27, Neither Hertz nor Aquila disclose the query structure for extracting data to generate report. However, it is known at the time of invention to a person with ordinary skill in the art that businesses generate reports for the data extracted with the query designed to meet the report requirements. For example, Quicken allows users to generate accounting data within range of dates, or, Human Resources in a business generate Affirmative Action Reports within date range to meet contract requirements, extract data and generate report for employees who are eligible for review etc.

Regarding claim 28, Neither Hertz nor Aquila disclose the query structure for extracting data to generate report. However, it is known at the time of invention to a

Art Unit: 3629

person with ordinary skill in the art that businesses generate reports for the data extracted with the query designed to meet the report requirements. For example, Quicken allows users to generate accounting data within range of dates, or, Human Resources in a business generate Affirmative Action Reports within date range to meet contract requirements, extract data and generate report for employees who are eligible for review etc.

Regarding claim 29, applicant acknowledges open rentals are rentals where the renter is actually in the vehicle, and, closed rentals are rentals where the customer has returned the vehicle. It is known at the time of invention to a person with ordinary skill in the art that Hertz system employs open rentals and closed rentals. It is obvious that open rentals do have in date.

Regarding claim 30, Hertz discloses maintaining file system for vehicle rentals. Hertz does not disclose associating claims adjusters with vehicle rentals. However, it is a business choice on a vehicle rental company like Hertz handle insurance claims. For example, a vehicle rental company may elect to have all vehicles insured by one Insurance Company, or, may elect to get the vehicles insured by plurality of Insurance Companies to minimize risk factor and local jurisdiction requirements.

Hertz does not disclose to generate query to search database (file system). However, it is known at the time of invention to a person with ordinary skill in the art that businesses generate reports for the data extracted with the query designed to meet the report requirements. For example, Quicken allows users to generate accounting data within range of dates, or, Human Resources in a business generate Affirmative Action Reports within date range to meet contract requirements, extract data and generate report for employees who are eligible for review etc.

Regarding claims 31 – 32, Hertz does not disclose to generate query to search database (file system). However, it is known at the time of invention to a person with ordinary skill in the art that businesses generate reports for the data extracted with the query designed to meet the report requirements. For example, Quicken allows users to generate accounting data within range of dates, or, Human Resources in a business generate Affirmative Action Reports within date range to meet contract requirements, extract data and generate report for employees who are eligible for review etc.

Claims 33 – 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hertz Corporation hereinafter known as Hertz in view of Motorola Corporation's online access to information to Motorola business partners hereinafter known as Motorola in

Art Unit: 3629

further view of Aquila et al US Publication US 2002/0035488 hereinafter known as  
Aquila

Regarding claims 33 and 42 – 43, applicant acknowledges that it is known to employ an electronic rental management system using private frame relay connections for communication. Such a system was employed to permit a vehicle rental service provider to provide an insurance claims center of an insurance company with a direct electronic connection to the vehicle rental service provider's branch locations. Such a system employed data entry, which was usually accomplished by the vehicle rental service provider's employee based within the insurance claims center [page2, lines 7 – 13]. Also, it is known at the time of invention to a person with ordinary skill in the art that businesses are known to use Electronic Data Interchange (EDI) to exchange data with business partners e.g. IBM's WebSphere, Message Queue Manager (MQM), APPC etc. to expedite transactions and minimize paper consumption. Hertz discloses system and method for managing rentals over a data communication network. Hertz allows customers to check rates and rent vehicles over the communication network.

It is obvious that Hertz system has network server with a file system which can be used by plurality of end users for accessing the information from server and file system [pages 19 – 22].

Hertz does not disclose allowing business partners to access Hertz system to get information with transactions they are involved in. Motorola discloses system and method which allows Motorola Business Partners with authorized access to view the

transaction they are involved in. Therefore, it is known at the time of invention to a person with ordinary skill in the art to automate manual business processes to save on personnel cost, create a paperless business environment etc.

Hertz does not disclose a server system including a database having rental claim information for each of said rentals. However, Hertz discloses storing the data related to the vehicle rental agreements on a file system [page 22], and, allowing customers to modify or change their reservations. It is a business choice to decide what information they want to store in the file system like a database to meet their business requirement.

Hertz discloses providing access to plurality of client systems [Fig. 1]

Hertz discloses employing a global communication network to interconnect server system client systems.

Hertz discloses displaying at least some of said rental information for one of said rentals at one of said client systems. Hertz does not disclose displaying claim information. However, Motorola discloses to provide business partner related information to the business partner. Therefore, it would have been obvious to a person with ordinary skill in the art to provide claim information to the insurance service provider business partner to save on personnel cost, create a paperless business environment etc.

Hertz discloses to allows users to modifying change or cancel reservations. It is obvious that Hertz allows users to modify information stored in the system.

Hertz does not discloses managing claim processing and reviewing claim information. Aquila discloses system and method which relates to insurance claim

processing systems in general, and more particularly to administering, tracking and managing insurance claim processing systems [0003]. Aquila discloses to review rental claim information [Fig. 4]. Therefore, it would have been obvious to a person with ordinary skill in the art to review claim information to minimize fraud.

Hertz does not disclose to generate query to search database (file system). However, it is known at the time of invention to a person with ordinary skill in the art that businesses generate reports for the data extracted with the query designed to meet the report requirements. For example, Quicken allows users to generate accounting data within range of dates, or, Human Resources in a business generate Affirmative Action Reports within date range to meet contract requirements, extract data and generate report for employees who are eligible for review etc.

Regarding claims 34 – 35, 37 – 41 and 44 – 48, Hertz does not disclose to generate query to search database (file system). However, it is known at the time of invention to a person with ordinary skill in the art that businesses generate reports for the data extracted with the query designed to meet the report requirements. For example, Quicken allows users to generate accounting data within range of dates, or, Human Resources in a business generate Affirmative Action Reports within date range to meet contract requirements, extract data and generate report for employees who are eligible for review etc., management extracting job costing report, determining job cost for each project in the job etc.

Regarding claim 36, it is business choice to decide what information they deem necessary to maintain, how they decide to generate the table in a database (fields in a table), and how they define relationships between tables.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
